PROFESSIONAL SUMMARY

Bachelor of Informatics Engineering graduate with skills in Web Development using React.js, Node.js, and Laravel. Experienced in building responsive web applications, integrating REST APIs, and developing data-based features. Have basic knowledge in system administration and IT support, including data management, software installation, and hardware troubleshooting. Familiar with using Google Cloud Platform for application deployment and basic infrastructure needs.

TECHNICAL SKILLS

Frontend Development : React.js, Tailwind CSS, HTML, CSS, JavaScript

Backend Development : Node.js, Express.js, Laravel, REST API, JWT Authentication

Database : MySQL

Cloud & Infrastructure : Google Cloud Platform (Compute Engine, Cloud Storage), Virtual Machine Deployment

IT Support & System : Hardware Troubleshooting (PC, Printer), OS Installation (Windows/Linux), Software Maintenance

Tools & Administration : Git & GitHub, Microsoft 365 (Word, Excel, Powerpoint), System Documentation

Softskill : Team Collaboration, Time Management, Problem Solving, Project Management, Adaptability, Communication

PROFESSIONAL EXPERIENCE

Curriculum Developer – Cloud Computing

October 2024 – September 2025

Google Developer on Campus Universitas Pasundan

- Created learning materials about Virtual Machine and application deployment using Google Cloud Platform to help participants understand cloud implementation
- Explained environment configuration and cloud usage so participants can try deployment independently
- Collaborated with team to prepare materials based on technical project needs

Cloud Computing Cohort

February 2024 – July 2024

Bangkit Academy led by Google, GoTo, & Traveloka 2024

- Developed REST API using Node.js to support data integration between backend and application
- Deployed application using Google Cloud Platform (Compute Engine and Cloud Storage) so the system can be accessed online
- Worked in a team using Agile method to keep development process structured
- Contributed to BabyGrowth application which won Best Capstone Product from more than 200 teams

Administrative Staff & IT Support

August 2020 – July 2021

SMK Angkasa Lanud Husein Sastranegara Bandung

- Managed incoming and outgoing letters and created official documents to keep data organized
- Managed and validated data using Microsoft Excel for administrative needs
- Installed and configured software based on operational needs
- Handled hardware troubleshooting (PC and printer) on demand to solve technical issues

Web Developer Intern

August 2019 – November 2019

PT Granesia Group Pikiran Rakyat

- Developed landing page using HTML, CSS, and Bootstrap to present company information
- Applied responsive design so the website works well on different devices
- Organized file structure and simple documentation for easier maintenance

EDUCATION

UNIVERSITAS PASUNDAN

Bachelor of Informatics Engineering | GPA 3.63 / 4.00

2021 – 2025

PROJECT EXPERIENCE

Apotek Doctor M+ – Pharmacy Operational System (Freelance Project)

- Acted as project lead in developing a web-based system to support digitalization of pharmacy operations
- Developed user interface using HTML, CSS, and JavaScript for user interaction and display
- Contributed in designing system flow so the process becomes more structured and easy to use
- Collaborated with backend team for system integration

EWastepas – E-Waste Pickup Application

- Developed user interface using React.js and Tailwind CSS for responsive display
- Managed data fetching from backend so data can be shown dynamically
- Implemented Progressive Web App (PWA) to support limited network conditions

BabyGrowth – Child Growth Monitoring Application

- Developed REST API using Node.js with JWT authentication to secure user data
- Deployed application using Google Cloud Platform so it can be accessed online
- Managed data storage using Cloud Storage to maintain data availability
- Collaborated in designing data structure for better backend and frontend integration
