Bandung, West Java | +62 877 2476 2167 | [Email](#) | [Linkedin](#) | [Github](#) | [Portfolio](#)

PROFILE SUMMARY

Bachelor's degree in Informatics Engineering with work and project experience in web development and IT Support. Experienced in building web interfaces, connecting frontend with backend, developing REST APIs, and deploying applications. Also experienced in data administration, documentation, and troubleshooting hardware and software

EXPERIENCE

Frontend Developer Intern

June 2026 – Sekarang

PT Dremaxtion Indonesia

- Implemented 3 landing pages based on Figma designs using Vue.js, TypeScript, Tailwind CSS, Laravel, and Inertia.js, and completed the review process with the Frontend Lead
- Worked on the Dashboard Links feature, including authentication, modal, dropdown, context menu, multi-select, and form validation, with backend integration
- Created reusable components for repeated UI parts and refactored parts of the codebase to make the structure more organized

Curriculum Developer – Cloud Computing

October 2024 – September 2025

Google Developer on Campus Universitas Pasundan

- Created 2 learning modules about Cloud Computing introduction and Virtual Machine setup using Google Cloud Platform
- Explained environment configuration and VM deployment through learning sessions and hands-on practice

Cloud Computing Cohort

February 2024 – July 2024

Bangkit Academy led by Google, GoTo, & Traveloka 2024

- Developed REST APIs using Node.js to support the food prediction feature of BabyGrowth
- Deployed the BabyGrowth backend using Google Compute Engine so the API could be accessed by the application
- Contributed to the development of BabyGrowth, which received the Best Capstone Product award among more than 200 teams

Administrative Staff & IT Support

August 2020 – July 2021

SMK Angkasa Lanud Husein Sastranegara Bandung

- Managed administrative documents and data using Microsoft Excel for administrative office operations
- Handled Wi-Fi connection troubleshooting and software installation on PCs independently
- Connected a printer to multiple PCs so it could be used together for daily operations

SELECTED PROJECTS

Tavio.id – Link-in-Bio Commerce Platform for Creators and Businesses

- Developed the frontend of Tavio.id using React.js, Laravel, and Inertia.js
- Provided input on business needs and the development plan for Tavio.id version 2
- Developed Tavio.id version 1, which is currently available in production

sixsafe.id – Cybersecurity Awareness Training Platform

- Implemented the UI for the landing page, admin dashboard, and user dashboard using Laravel Blade Templates
- Provided UI feedback based on issues found while working on the training features

BabyGrowth – Child Growth and Development Monitoring Application

- Developed REST APIs using Node.js and JWT Authentication to support the food prediction feature based on child growth and development needs
- Deployed the backend using Google Compute Engine so the API could be accessed by the application
- Used Google Cloud Storage to store prediction results from the Machine Learning team

SKILLS

Frontend: React.js, Vue.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, Laravel, REST API, JWT Authentication

Database & Cloud: MySQL, PostgreSQL, Google Cloud Platform, Compute Engine, Cloud Storage

Tools : Git, GitHub, GitLab, Linux, Docker, Figma

IT Support & Administration: Microsoft Excel, Windows/Linux, Software Installation, Hardware Troubleshooting, Documentation

EDUCATION

UNIVERSITAS PASUNDAN

Bachelor of Informatics Engineering | GPA : 3.63 / 4.00
2021 – 2025
